DETAILED ACTION

- 1. This action is issued in responds to application amendment/ RCE filed 6/15/07.
- 2. Claims 1-22 were amended. Claim 23 was added. No Claims were canceled.
- 3. Claims 1-23 are pending.

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 6/15/07 has been entered.

Response to Arguments

Applicant's arguments with respect to claims 1-23 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-23 are rejected under 35 U.S.C 102(e) as being anticipated by Peters et al. (Peters hereinafter) US Patent NO. 5,884,284 filed Aug. 6, 1997. Issued March 16, 1999. Applicant is advised to consider the reference as a whole.

Art Unit: 2164

. 2164

Regarding Claims 21, 1, 23, and 22, Peters discloses a method, apparatus, and computer program product residing on a computer-readable medium for managing workflows in a service provider environment in which a service provider provides data storage resources to a customer, the computer program product comprising instructions causing a computer to:

provide a the customer with a list of types of work order requests to select work to be performed (Col. 19, lines 4-9, wherein the choices provided to the user corresponds to the list of types of work orders, Peters) based on a permission level defining a level of access to the data storages resources allowed to associated with the customer (Col. 5, lines 39-42, Peters), the work order requests comprising requests to manage configuration of the data storage resources provided to the customer (Col. 5, lines 42-46, Peters), wherein the types of work order requests comprise at least one of requests to:

connect the data storage resources to a server (Col. 5, liens 50-52, wherein the installed on the network corresponds to the claimed limitation, Peters):

allocate the data storage resources to a customer account (since the claims calls for at least one of the request, only one has been addressed the rest will not be addressed by art);

create a mirror;

restore remote mirroring; or

split a business continuance volume (BCV);

Art Unit: 2164

receive a selection of a type of work order request from the customer prior to performance of work associated with the selection (Col. 5, lines 55-60, wherein the cited numerous options corresponds to the selection claimed, Peters):

enable the customer to generate a work order request of the selected type in a work order request submission (Col. 7, lines 44-48, wherein the variety of reports and bills are generated, and col. 8, lines 47-46-50, wherein the user is enable to view, modify and update in other words generate a report, Peters);

create a database object based on the work order request; and store the database object in a database (Col. 19, lines 20-21, Peters).

Regarding Claims 2. Peters discloses a method, wherein enabling comprises: providing to the customer at least one task screen corresponding to the selected type of work order request and usable by the customer to generate the work order request (Col. 9, lines 17-27, Peters).

Regarding Claim 3. Peters discloses a method, wherein the work order request comprises values of parameters specific to the selected type of work order request (Col. 9, lines 35-42, wherein the functions including billing, messages, function which corresponds to the values of parameters specific type, Peters).

Regarding Claim 4, Peters discloses a method, wherein the database object comprises elements that include a customer identifier and the selected type of work order request (Col. 9, lines 49-56, wherein the order information corresponds to the element including customer identifier, Peters).

Art Unit: 2164

Regarding Claim 5, Peters discloses a method, wherein the elements further include a state to indicate status of the work order request (Col. 9, lines 51-56, wherein the work order discloses the status of the work order such as cancel work, modify order which corresponds to the claimed state to indicate the status, Peters).

Regarding Claim 6, Peters discloses a method, wherein the state is set to indicate a new" work order request initially and later changed to indicate a closed work order request (Col, 10, lines 30-36, Peters).

Regarding Claim 7, Peters discloses a method, further comprising:

assigning a work order request identifier to the work order request (Col. 13, lines 1-11, wherein the command for report function corresponds to the work order request identifier, Peters); and

providing the assigned work order request to the customer (Col. 13, lines 44-51, Peters).

Regarding Claim 8, Peters discloses a method, wherein the database object is stored in the database as a table entry (Fig. 3, step 122, Peters), the table entry including fields to store information associated with each of the elements (Fig. 4, Peters).

Regarding Claim 9, Peters discloses a method, wherein the elements further comprise the assigned work order request identifier and the work order request is stored in one of the fields in the table entry (Fig. 4, step 142, Peters).

Regarding Claim 10, Peters discloses a method, further comprising:

Art Unit: 2164

processing the work order request using the table entry, processing comprising attempting to perform any tasks required to satisfy the work order request (Col. 16, lines 6-12, Peters); and

updating the state based on the results of the processing (Col. 9, lines 50-56, Peters).

Regarding Claim 11, Peters discloses a method, wherein updating comprises: marking the state to indicate that the work order request is closed if such tasks are performed successfully (Col. 10, lines 40-44, Peters); and

marking the state to indicate a failure if such tasks are not performed successfully; (Col. 10, lines 33-34, wherein the "delete miscellaneous jobs which are not related to work order corresponds to the limitations of failure if such tasks are not performed successfully, Peters).

Regarding Claim 12, Peters discloses a method, further comprising:

generating a billable event when the work order request is closed (Col. 29, lines

3-10, Peters); and

storing the billable event in the database in association with the customer identifier and account information (Col. 29, lines 11-17, Peters).

Regarding Claim 13, Peters discloses a method, wherein work order request submission is in the form of an email (Col. 5, Lines 2-6, Peters).

Regarding Claim 14, Peters discloses a method, wherein work order request submission is in the form of HTTP (Col. 15, lines 33-35, wherein the "on-line" corresponds to the HTTP since it is an on line service, Peters).

Art Unit: 2164

Regarding Claim 15, Peters discloses a method, wherein processing is managed by a workflow automation that periodically queries the database to locate any new work order requests based on the state in the table entry for each work order request (Col. 15, lines 61-64, wherein the automatic update corresponds to the claimed periodically queries the database to locate any new work order requests based on the state in the table entry for each work order request, Peters).

Regarding Claim 16, Peters discloses a method, wherein the processing, updating, and the generating and storing of the billable event are handled by the workflow automation (Col. 30, lines 39-46, Peters).

Regarding Claim 17, discloses a method, wherein the workflow automation invokes other processes needed to perform the work order request (Col. 29, lines 23-50, the cited functions are used to perform the work order, Peters).

Regarding Claim 18, Peters discloses a method, wherein processing is managed manually by an administrator of the service provider (Col, 5, lines 38-43, Peters).

Claim 19, Peters discloses a method, wherein the processing, updating, and the generating and storing of the billable event are handled manually by the service provider administrator (Col. 5, lines 38-48, Peters).

Regarding Claim 20, Peters discloses a method, wherein the processing, updating, and the generating and storing of billable events are managed manually by the service provider administrator when the state indicates a failure (Col.10, lines 22-36, Peters).

Art Unit: 2164

Point of Contact

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sana Al-Hashemi whose telephone number is 571-272-4013. The examiner can normally be reached on 8Am-4:30Pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Charles Rones can be reached on 571-272-4085. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
